In Eurobox Polska – 20 years have passed,  
the new plant has started ...

ZBIGNIEW KRZYŻAK

General Director Dunapack Eurobox Polska Ujazd

This year is very special for Eurobox Polska. We celebrate the 20<sup>th</sup> anniversary of establishing the company in Ujazd and – two years after the decision to build it – the second plant in Lubliniec is already successfully operating. The new site was created at an express speed of one year. We have already invested over PLN 200 m. We have built the production hall, the area of which in the first stage amounts to almost 30,000. m<sup>2</sup> and it will eventually be expanded in the following years to around 45, 000 m<sup>2</sup>. Over 140 people have already been employed. By the end of the year, another 50 will join them, and finally the employment may reach 300 people. We produce 3 and 5-layer corrugated board with different flute types on one of the most modern high-speed 2.8 m wide corrugator supplied by BHS Corrugated. The corrugated board from Lubliniec is sold to other manufacturers. Unlike Ujazd, which we use entirely for the needs of

our own converting. With Bobst machines we convert corrugated board into different packaging: flat cut and rotary, flap and glued multi-point. At both our plants we operate “in full swing” for 3 shifts, very often also on weekends. Everything went according to the plan. Already after 4 months from the start up the new plant in Lubliniec overtook the first plant with production capacity on some lines. We are happy with our success and we still have an appetite for more. According to our plans, the plant in Lubliniec should produce 240 000 000 m<sup>2</sup> of packaging in 6-7 years. We will also expand the plant in Ujazd so that it will not give in to the new one. And in the near future we plan the construction of another, third factory. The location is already specified and we are finalizing details. In accordance with the strategy of our owner – Prinzhorn Holding – by 2030 Eurobox Polska should operate five plants.
